OUR WORK SPEAKS FOR ITSELF

Toledo's Trusted Fence Professionals

Why Toledo Homeowners Choose Ghareeb Fencing

INSTALLER-OWNED & OPERATED

Our owner has installed hundreds of fences — reading slopes and tight corners before they become problems.

TRAINED, IN-HOUSE CREW

Trained in-house, the same faces start to finish — never day laborers or rotating strangers.

REINFORCED GATES

Vinyl gates carry aluminum reinforcement inside the frame. Built not to sag.

HOMELAND VINYL

We install Homeland vinyl: 5" × 5" posts with a .150" wall, thicker than the big-box brand.

TRANSPARENT, DETAILED QUOTES

Price, exact materials, and scope in writing. What we write is what you pay — no pressure, ever.

A WARRANTY THAT HOLDS UP

Three years on workmanship plus manufacturer material warranties. Not right? We make it right.

A NOTE FROM THE OWNER

When you hire us, you get the person whose name is on the company. I still walk every estimate, read every yard, and stand behind every post we drive. We're a small Toledo family business — your fence is how our name gets around, and we build it that way. Thank you for letting us earn it.

Nicholas — Owner & Installer

No-Dig Steel Post Fencing

Driven steel posts that hold tight in Toledo clay and stay put through freeze and thaw

How it works

Instead of digging holes and pouring concrete, we drive 8-foot galvanized steel posts, 2½ inches across, a full 4 feet into the ground. The fence builds off that steel core, with nothing to mix, cure, or crack underground. No spoil piles, no torn-up lawn.

Why it matters here

Northwest Ohio clay and freeze-thaw winters are hard on concrete footings. Water works in, freezes, and heaves posts out of line over a few seasons. A driven steel post sets tight in clay and stays put — with no wood-in-concrete underground to wick water and rot out first.

Below frost line

Posts driven deep, not floated in a footing

Zero concrete

Nothing to mix, cure, or crack underground

No cure time

Panels go on as soon as the posts are in

We check your soil at the estimate.
Ask us to drive a demo post — two minutes tells you everything.

(419) 214-2107

POST INSTALLATION, COMPARED

Why We Drive Posts in Clay

The post underground is the part you never see and the part that fails first. Here is how the common methods stack up in Toledo clay.

POOR

Wood Post in Dirt

The low-bid shortcut

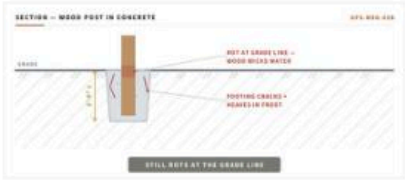

Post: PT wood 4x4
Set: Tamped dirt, ~2 ft deep

- ✓ Lowest price up front
- ✗ Whole buried post sits in wet soil
- ✗ Frost pushes it up each winter
- ✗ Leans as the dirt settles
- ✗ Usually the first post to fail

BETTER

Wood Post in Concrete

The old neighborhood standard

Post: PT wood 4x4
Set: Concrete, ~2.5 ft deep

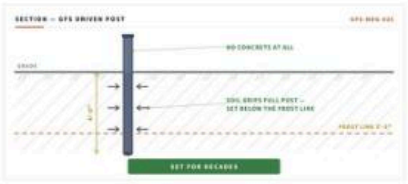

- ✓ Holds straighter than dirt
- ✓ Familiar, widely used
- ✗ Rots where it meets the concrete
- ✗ Footing can heave in frost
- ✗ Hard to fix once it fails

BEST

★ RECOMMENDED

Driven Steel Post

Our King Plus method

Post: 8 ft galv. steel, 2.5" dia.
Set: Driven 4 ft, no concrete

- ✓ No concrete, so no frost heave
- ✓ Soil grips the full post
- ✓ Driven 4 ft, below the frost line
- ✓ Galvanized: won't rot or rust
- ✓ Bends on impact, won't crack

POOR SOIL UPGRADE

Steel Post in Concrete

Driven posts need clay to grip. In sandy or loose soil we set PT wood posts in concrete. Want steel there instead? A galvanized steel post set about 3 ft deep in concrete is available as an upgrade.

Driven a full 4 ft down. Toledo's frost line runs about 3 ft, so our posts anchor below it in undisturbed clay. The “+” in King Plus is an extra top rail that locks your pickets straight and crowns the fence.

01

HOMELAND VINYL

Vinyl Fencing

Made in the USA, thicker walls than the big-box brand, and aluminum inside every gate.

PREMIUM PRIVACY SOLUTIONS

Vinyl Privacy Fencing

Low-maintenance privacy with no painting or staining

GOOD	BETTER	BEST
		★ RECOMMENDED
Wood Privacy	**Big Box Vinyl**	**Homeland Premium**
• 15–30 year lifespan (cedar)	• Thinner .135" post walls	• .150" post walls
• High maintenance	• Low maintenance	• No painting or staining
• Warping is common	• Can flex more in wind	• Resists warping
• Needs staining	• Limited lifetime warranty	• Limited lifetime warranty

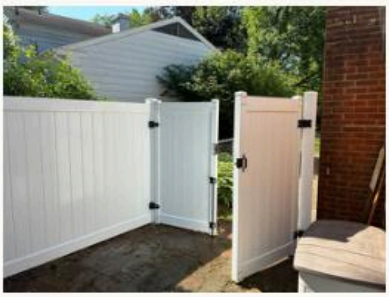

✓ **Complete Privacy** ✓ **No Maintenance** ✓ **UV Protected** ✓ **Lifetime Warranty**

The Hidden Cost of Cheap Vinyl

Thinner walls flex, crack, and yellow sooner, so cheap vinyl often needs replacing while quality vinyl is still going strong.

The Homeland Difference

Made in the USA with ACCU-Shield UV protection, thicker walls, and aluminum in every gate — backed by Homeland's limited lifetime warranty.

Homeland vs. the Big-Box Brand

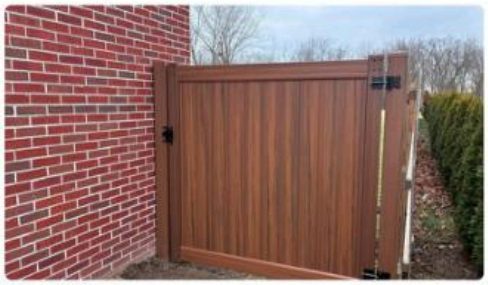

Post Wall · Rails · Reinforcement · UV Protection

HOMELAND VS. THE BIG-BOX BRAND

GFS-V-CMP

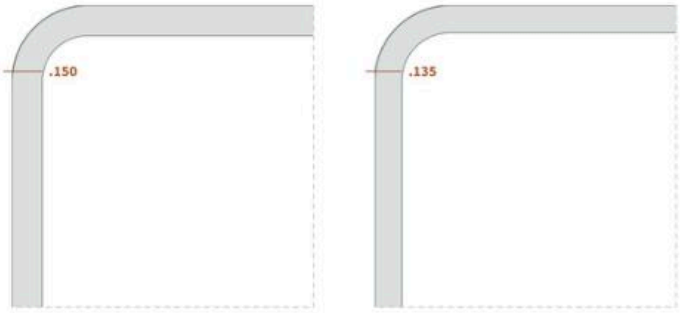

WHY WE INSTALL HOMELAND

POST CORNER, PRINTED AT FULL SIZE

HOMELAND · .150" WALL

CATALYST · .135" WALL

+11%

thicker post wall.

Same 5" post on the outside. Homeland's wall is .150" thick; Catalyst's 5" post is listed at .135". That's 1/64" on paper, and it runs all the way around every post on the job.

Homeland makes its vinyl in the USA, at six plants.

	HOMELAND · WHAT WE INSTALL	CATALYST · SOLD AT LOWE'S
Post wall	5" × 5" × .150"	5" × 5" × .135"
Privacy rail	2" × 7" (Kingston) · 1¾" × 5½" × .090 (Rockport)	Varies by line, 1½" × 5½" to 2" × 8"
Metal inside	Aluminum stiffeners inside every gate	Aluminum inserts only where the kit calls for them
UV protection	ACCU-Shield outer layer + titanium dioxide	UV inhibitors
Testing	VMA certified · Miami-Dade performance tested	Not stated in their kit literature
Installed by	Our crew, posts set for your soil	Sold as DIY kits

Catalyst figures from Catalyst dealer listings and kit instructions, Nov. 2026. Both carry limited lifetime warranties.

Not all vinyl is the same. Here's what we install next to the brand on the shelf at Lowe's.

2

DURING INSTALL

- ✓ Post depth verified
- ✓ Every run checked for level
- ✓ Gate swing tested
- ✓ Progress photos uploaded

IN YOUR PORTAL

- Layout confirmed
- Gates verified
- Property lines held
- Your sign-off

3

FINAL WALKTHROUGH

- ✓ Complete inspection with you
- ✓ Hardware checked and adjusted
- ✓ Gate alignment dialed in
- ✓ Site cleaned, debris hauled

IN YOUR PORTAL

- Full inspection
- Hardware tested
- Clean-up done
- Final sign-off

Photo documentation · issues caught early · your approval required. That's the promise — nothing moves forward until you're satisfied.

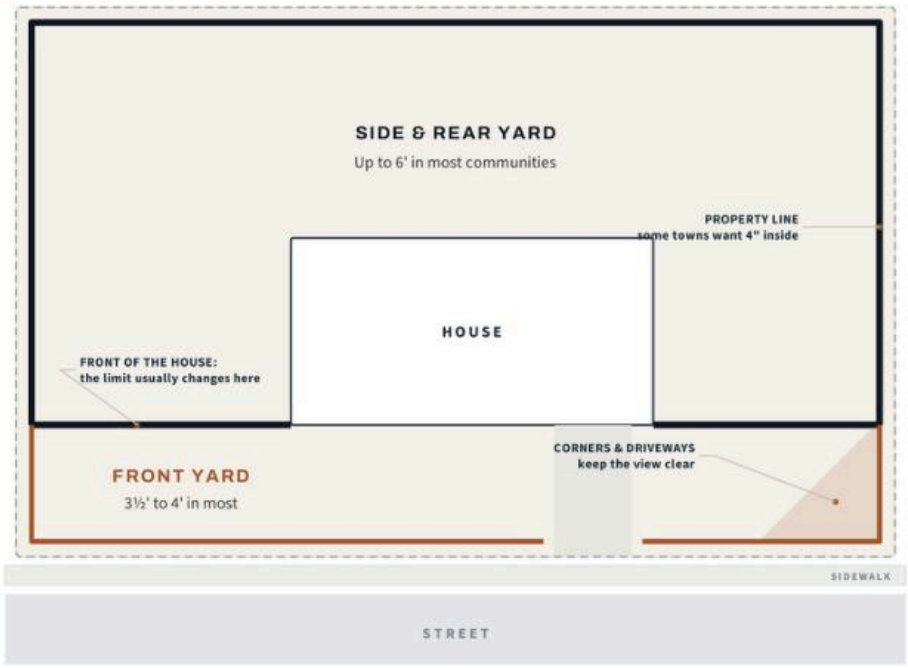

Local Fence Rules

Height limits · permits · what towns ask for

FENCE RULES AT A GLANCE

GFS-RULES-1

WHERE THE HEIGHT LIMITS USUALLY CHANGE · PLAN VIEW, TYPICAL LOT

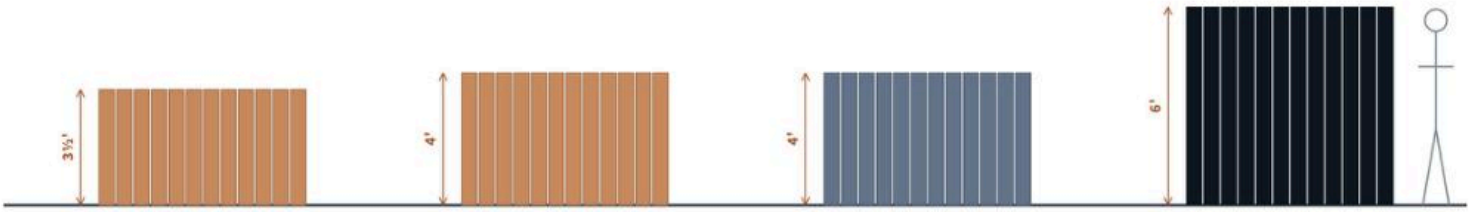

READING THE DRAWING

- **Side and rear fence** — Usually up to 6'. Privacy styles go here.
- **Front yard fence** — Usually 3½' to 4'. Some towns ask for an open style.
- **Property line** — Most towns let you build on your side of it.

RULES NEARLY EVERY TOWN SHARES

- **Good side out** — Posts and rails face your yard, the finished face faces the neighbor.
- **Corner lots** — Both street sides can count as front yards.
- **Pools** — A barrier of about 4' with a self-closing, self-latching gate.
- **Utilities** — 811 locate before any post goes in. We call it in.
- **HOAs** — Deed and HOA rules can be stricter than the town's.

HEIGHTS SIDE BY SIDE · ELEVATION

FRONT YARD	FRONT YARD	POOL BARRIER	SIDE & REAR
Toledo, Sylvania, Rossford, Bedford Twp	Perrysburg, Oregon, Springfield Twp	Typical minimum, with a latching gate	Standard privacy height

Typical limits only. The next two pages list what each community publishes.

Most towns follow the same pattern. Low in the front yard, up to six feet at the side and rear.

What Our Customers Say

Real reviews from Google, Facebook & BBB — reproduced word for word

★★★★★ **Roy Gene Palmer III**

Excellent Work and Great Customer Service

Nick did an outstanding job installing our traditional cedar picket fence. From the start, he was incredibly patient in working through the details of our project and offered several creative solutions when we encountered challenges with our property layout.

What impressed me most was how he worked within our budget constraints to find the best possible option without compromising on quality. The finished fence looks fantastic - the craftsmanship is top-notch and you can tell Nick takes pride in his work.

His communication throughout the project was excellent, and he was always willing to explain his recommendations and answer our questions. I'd definitely recommend Nick to anyone looking for a reliable fence contractor who delivers quality work at a fair price.

★★★★★ **Josh Smith**

Hired Nick and Ghareeb Fencing solutions. We opted for a cedar privacy fence. Nick knocked it out of the park. Price was very competitive and the job was completed on budget and on schedule. They left the yard in clean state and were happy to talk to the neighbors about what to expect with the install. 10/10 would recommend again

The fence has been up for about 6 months through winter and looks as good as when he installed it.

★★★★★ **Dashawn Nickson**

I just got my fence done today June 6, 2025 and let me say this is a five star Fencing service complete my entire yard within two days always on schedule always answer calls reasonable prices. The workers are very nice and they work extremely hard nonstop. I definitely recommend

---

★★★★★ **Jenny Wilhelm Pfeiffer**

Nicholas was amazing to work with! Nicholas was very knowledgeable and patient with us with our decision making. He did not push vinyl on us knowing that wasn't what we wanted, unlike the other companies that quoted us. Our fencing was built from scratch, no pre-made fencing here! We cannot say enough good things about this business and the gentleman that he had working with him on our project. All of his employees were very kind and respectful. 100% a customer for life and absolutely recommend if you are looking for new fencing! Oh and he beat his competitors by over $1000.00!!!! Thank you so much for our amazing fence!

★★★★★ **Theresa C.**

Had around 230 linear feet of white vinyl fence installed 6/25/25. They finished the job the next day. Nicholas and his team were wonderful. From beginning to end. From the communication to the product and the install. If you need a fence you don't have to look any further. I highly recommend.

★★★★★ **Jenna Spetz**

We have nothing to say but amazing things about Ghareeb Fencing! We were so undecided about what we needed/wanted for our awkward lot(s) and Nick was SUPER patient. He talked us through each option and listened to my endless rants. We gathered several quotes and went with Ghareeb for the trust value. Their team provided outstanding communication and made the process seamless. Highly recommend!

★★★★★ **Marissa Barnes**

Amazing to work with! gave a great quote & we're able to get our fence up quickly. even thought of our dogs making sure they would be able to come out if needed while he worked. cannot recommend them enough!

Frequently Asked Questions

Straight answers up front — and a real person at (419) 214-2107 for the rest

Q. How long does installation take?

Most residential fences go up in 1–3 days. We confirm your install dates before we schedule, and the crew cleans up daily.

Q. Do I need a permit?

Most local zoning requires one. We pull and handle permits for you — it's built into every quote.

Q. Do you offer financing?

Yes — financing is available for qualifying customers. Ask us for current terms and rates.

Q. What's the warranty?

Three years on workmanship from us, plus the manufacturer's limited lifetime warranty on Homeland vinyl.

Q. Do I need to be home during the install?

No — but we recommend being there for the first and final walkthroughs so you and the crew stay on the same page.

Q. What areas do you serve?

Northwest Ohio & Southeast Michigan — Toledo, Perrysburg, Maumee, Sylvania, Monroe, Temperance, and nearby.

More questions? (419) 214-2107 · ghareebfence.com — we're happy to help.

COMPARE APPLES TO APPLES

What's Actually in Your Quote

The lowest number isn't always the lowest price. Here's what we spell out — and what's easy to leave off a cheaper bid.

IN EVERY GFS QUOTE	EASY TO LEAVE OFF A BID
✓ Post type, size, and depth *(in writing)*	✗ "Posts in concrete" with no depth listed
✓ Vinyl brand and wall thickness, in writing	✗ Vinyl with no brand or wall thickness listed
✓ Aluminum-reinforced gate frames and hardware	✗ Gate hardware added on later
✓ Post foundation matched to your soil	✗ One method for every yard, clay or sand
✓ Full grading and cleanup, debris hauled	✗ Grading and cleanup billed separately
✓ Permits pulled and handled	✗ "Permit is your responsibility"
✓ 3-year written workmanship warranty	✗ A verbal warranty only
✓ One accountable crew, owner on site	✗ Subcontractors, no single point of contact

Missing any of these? Then it isn't cheaper — it's just less finished. Ask for it in writing and the real comparison gets clear fast.

SIMPLE 4-STEP PROCESS

Getting Started Is Easy

From the first call to the final walkthrough — here's exactly what happens

1

FREE CONSULTATION

Schedule your free on-site estimate. We walk the yard together, measure, and answer everything before you commit to anything.

2

CUSTOM PROPOSAL

Usually within a day or two, your detailed proposal lands in the client portal — exact materials, line-item pricing, and a timeline.

3

EASY APPROVAL

Review and sign digitally. Make your deposit by card, check, cash, ACH, or Venmo — and we pull the permits.

4

EXPERT INSTALLATION

Our crew installs with precision, cleans up daily, and walks you through the finished project before we call it done.
