OUR WORK SPEAKS FOR ITSELF

Toledo's Trusted Fence Professionals

Why Toledo Homeowners Choose Ghareeb Fencing

INSTALLER-OWNED & OPERATED

Our owner has installed hundreds of fences — reading slopes and tight corners before they become problems.

TRAINED, IN-HOUSE CREW

Trained in-house, the same faces start to finish — never day laborers or rotating strangers.

HEAVY-DUTY STEEL-FRAME GATES

Wood gates get steel frames welded in our shop. Built not to sag.

DIRECT MILL RELATIONSHIPS

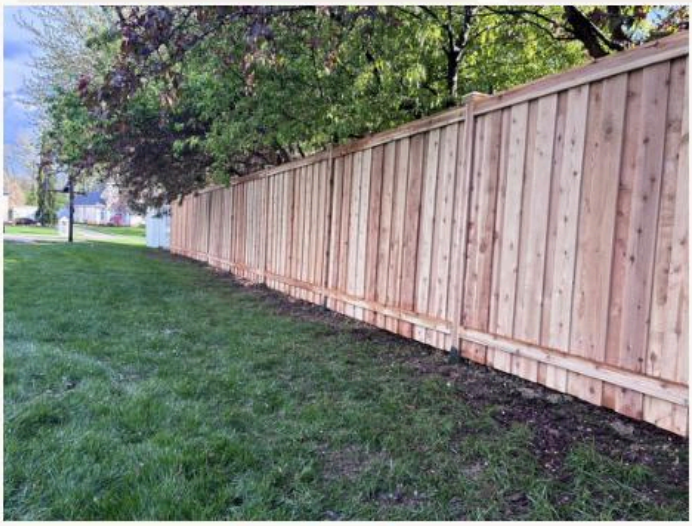

Western Red Cedar is our standard. Premium Northern White Cedar and cedar split rail come from Michigan U.P. mills.

TRANSPARENT, DETAILED QUOTES

Price, exact materials, and scope in writing. What we write is what you pay — no pressure, ever.

A WARRANTY THAT HOLDS UP

Three years on workmanship plus manufacturer material warranties. Not right? We make it right.

A NOTE FROM THE OWNER

When you hire us, you get the person whose name is on the company. I still walk every estimate, read every yard, and stand behind every post we drive. We're a small Toledo family business — your fence is how our name gets around, and we build it that way. Thank you for letting us earn it.

Nicholas — Owner & Installer

No-Dig Steel Post Fencing

Driven steel posts that hold tight in Toledo clay and stay put through freeze and thaw

How it works

Instead of digging holes and pouring concrete, we drive 8-foot galvanized steel posts, 2½ inches across, a full 4 feet into the ground. The fence builds off that steel core, with nothing to mix, cure, or crack underground. No spoil piles, no torn-up lawn.

Why it matters here

Northwest Ohio clay and freeze-thaw winters are hard on concrete footings. Water works in, freezes, and heaves posts out of line over a few seasons. A driven steel post sets tight in clay and stays put — with no wood-in-concrete underground to wick water and rot out first.

Below frost line

Posts driven deep, not floated in a footing

Zero concrete

Nothing to mix, cure, or crack underground

No cure time

Panels go on as soon as the posts are in

We check your soil at the estimate.
Ask us to drive a demo post — two minutes tells you everything.

(419) 214-2107

POST INSTALLATION, COMPARED

Why We Drive Posts in Clay

The post underground is the part you never see and the part that fails first. Here is how the common methods stack up in Toledo clay.

POOR

Wood Post in Dirt

The low-bid shortcut

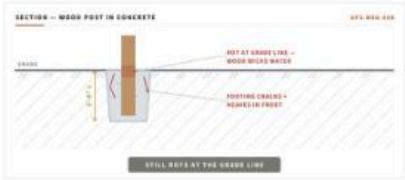

Post: PT wood 4x4
Set: Tamped dirt, ~2 ft deep

- ✓ Lowest price up front
- ✗ Whole buried post sits in wet soil
- ✗ Frost pushes it up each winter
- ✗ Leans as the dirt settles
- ✗ Usually the first post to fail

BETTER

Wood Post in Concrete

The old neighborhood standard

Post: PT wood 4x4
Set: Concrete, ~2.5 ft deep

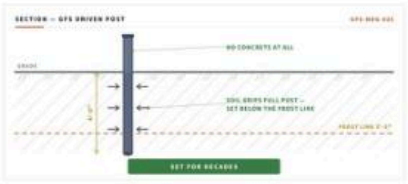

- ✓ Holds straighter than dirt
- ✓ Familiar, widely used
- ✗ Rots where it meets the concrete
- ✗ Footing can heave in frost
- ✗ Hard to fix once it fails

BEST

★ RECOMMENDED

Driven Steel Post

Our King Plus method

Post: 8 ft galv. steel, 2.5" dia.
Set: Driven 4 ft, no concrete

- ✓ No concrete, so no frost heave
- ✓ Soil grips the full post
- ✓ Driven 4 ft, below the frost line
- ✓ Galvanized: won't rot or rust
- ✓ Bends on impact, won't crack

POOR SOIL UPGRADE

Steel Post in Concrete

Driven posts need clay to grip. In sandy or loose soil we set PT wood posts in concrete. Want steel there instead? A galvanized steel post set about 3 ft deep in concrete is available as an upgrade.

Driven a full 4 ft down. Toledo's frost line runs about 3 ft, so our posts anchor below it in undisturbed clay. The “+” in King Plus is an extra top rail that locks your pickets straight and crowns the fence.

01

WOOD & CEDAR

Wood Fencing

Western Red Cedar as standard, Northern White Cedar as the premium, and pressure-treated pine, built board by board on site.

Wood — Good, Better, Best

Pick the style · then pick the lumber

WOOD — GOOD · BETTER · BEST

GFS-W-TIER

STEP 1 · PICK THE STYLE · RENDERED FROM OUR ESTIMATING SOFTWARE

GOOD

Dog-Ear Privacy

Standard privacy

PRIVACY	90–95%
BOTH SIDES	One finished face
AIRFLOW	Minimal
COST	$

BEST FOR
Budget projects and side yards

BETTER

Shadowbox

Alternating boards

PRIVACY	70–85%
BOTH SIDES	Yes, great from both
AIRFLOW	Good
COST	$$

BEST FOR
Shared property lines

BEST — RECOMMENDED

Board-on-Board

Overlapping privacy

PRIVACY	100%, no gaps
BOTH SIDES	Yes, finished both
AIRFLOW	Minimal
COST	$$$

BEST FOR
Complete privacy, premium look

STEP 2 · PICK THE LUMBER

Good	Pressure-treated pine. Up to about 15 years. The lowest-cost wood.
Better	Western Red Cedar, our standard cedar. 15–30 years, natural oil resistance.
Best	Northern White Cedar, grown and milled in Michigan. 15–30 years, very decay resistant.

Ask for good, better and best on one quote.
We can price all three for your yard so you can compare them side by side.

(419) 214-2107

Add to any tier: welded steel-frame gate, lattice top, or cap and trim.

Two choices set your tier. The style first, then the lumber.

STANDARD & PREMIUM CEDAR

Cedar Fencing

Western Red Cedar is our standard cedar. Northern White Cedar is the premium upgrade.

GOOD	BETTER	BEST
		★ RECOMMENDED
Pressure Treated Pine	**Western Red Cedar**	**Northern White Cedar**
• Chemical-dependent	• Natural oil resistance	• Very decay resistant
• Up to ~15 year lifespan	• 15–30 year lifespan	• 15–30 year lifespan
• Prone to warping	• Good stability	• Bright, clean grain
• High maintenance	• Moderate maintenance	• Grown and milled in Michigan

PT Pine Limitations

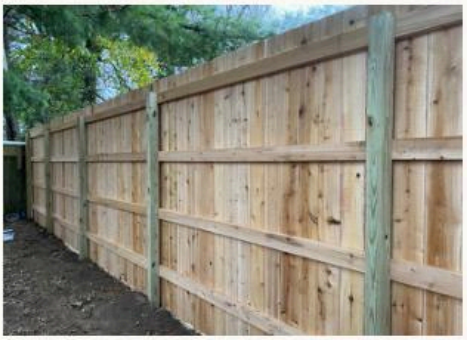

- ✗ Chemical treatment wears off
- ✗ Cracks and splits
- ✗ Warps as it dries
- ✗ Frequent maintenance
- ✗ Shorter lifespan

Cedar Advantages

- ✓ Natural decay resistance
- ✓ Dimensionally stable
- ✓ Beautiful, even grain
- ✓ Lightweight yet strong
- ✓ Sustainable and renewable

Ready to explore cedar?
Free estimates · No pressure · Premium cedar from Michigan mills

(419) 214-2107

THE SCIENCE BEHIND CEDAR

Why Cedar Outperforms Treated Pine

It comes down to what's in the wood and how it handles our wet, freezing winters

Thujaplicins

Natural compounds in the heartwood that resist rot

~22 lb/ft³

Lightweight, easy on hardware

No Chemicals

Rot resistance is in the wood

Stays Flatter

Shrinks and twists less than PT as it dries

PT Pine: The Reality

Pressure-treated pine relies on chemical preservatives forced into the wood. The treatment doesn't reach all the way through, so cuts and cracks expose untreated wood.

It also usually ships wet, so it shrinks, checks, and twists on your fence as it dries in place.

Cedar is drier and moves less as it ages.

Cedar Styles We Offer

Board-on-Board Privacy

100% privacy from any angle

Shadowbox

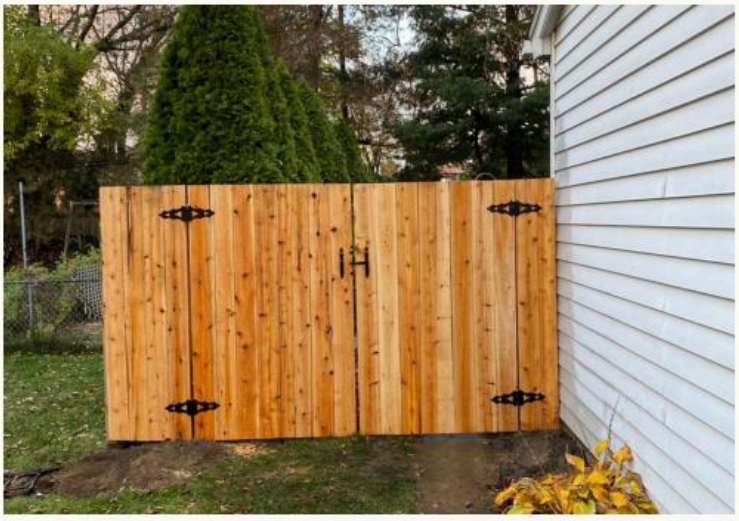

Looks great from both sides

Lattice Top

Privacy with a decorative accent

Premium Northern White Cedar. Sourced from Michigan's Upper Peninsula. The USDA Wood Handbook rates its heartwood “resistant to very resistant” to decay, its top rating.

THUJA OCCIDENTALIS

Northern White Cedar

Rated “resistant” to “very resistant” to decay in the USDA Wood Handbook — figures on this page are from it

SPECIFICATIONS

Origin	Great Lakes — Michigan U.P.
Lifespan	15–30 years, typical for cedar
Decay resistance	Resistant–very resistant
Shrinkage	Low, ~7% green to dry
Density	About 22 lb/ft^3 dry
Maintenance	Low

Small Mill, Big Difference

We buy direct from family mills in Michigan's Upper Peninsula — no distributor, no big-box mystery lumber.

Every board is inspected before it goes on your fence, and we can source thicker, true-dimension boards on request.

Board Thickness

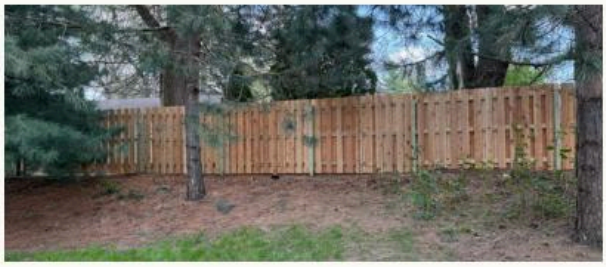

Standard 1×6 (what we install)

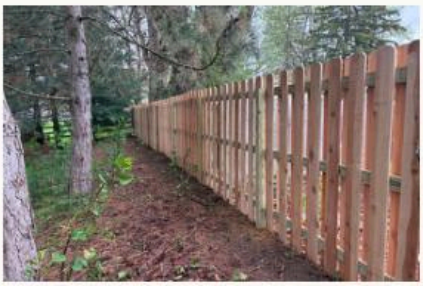

Actual: ¾" × 5½"

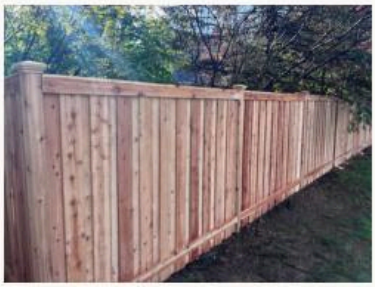

True-dimension 1×6 (on request)

Actual: 1" × 6" — full thickness, sourced to order

Hybrid build: PT frame + cedar pickets. PT 2×4 rails, with posts set for your soil: driven steel in clay, PT wood in concrete in sand. Cedar goes where you see it, with galvanized nails throughout.

Cedar fences on real Toledo-area installs.

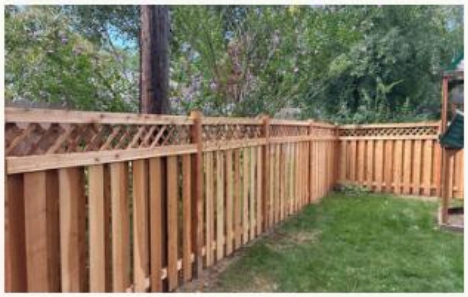

AT A GLANCE

Cedar Fence Options

Every cedar build we offer, side by side — privacy, lifespan, and where each one makes sense

STYLE	MATERIAL	PRIVACY	LIFESPAN	PRICE
Cedar Privacy	WRC	100%	15–30 yrs	$$
Cedar Shadowbox	WRC	70–85%	15–30 yrs	$$
Lattice Top	WRC	75%	15–30 yrs	$$$
PT Frame + Cedar	Hybrid	100%	~15 yrs	$
Premium White Cedar	**N. White**	**100%**	**15–30 yrs**	**$$$$**

Every option above is built board-by-board on site — never a prefab panel.

PROFESSIONAL INSTALLATION

Built Right, Board by Board

The details that decide whether a cedar fence still looks good in year fifteen

Heavy-Duty 4×6 Gate Posts

Prevents the sag that kills most gates

Built Board-by-Board

Custom fit to your yard, never prefab

Premium Hardware

Decorative hinges and latches, built to last

Galvanized Nails

3" on the frame, 1¾" coil nails on every picket

PT Pine Issues

- ✗ Warps as it dries
- ✗ Cracks and splits
- ✗ Chemical smell
- ✗ Requires regular sealing
- ✗ Green/brown fades out
- ✗ Heavy to work with
- ✗ Shorter lifespan
- ✗ Chemical preservatives

Cedar Advantages

- ✓ Stays straight
- ✓ Resists cracking
- ✓ Pleasant natural scent
- ✓ Sealing is optional
- ✓ Beautiful, even grain
- ✓ Lightweight and strong
- ✓ Longer lifespan
- ✓ Sustainable and renewable

✓ **Built Board-by-Board** ✓ **4×6 Gate Posts** ✓ **3-Year Warranty** ✓ **Standard & Premium Cedar**

CLASSIC PRIVACY SOLUTIONS

Wood Privacy Fencing

From prefab to professional — understand exactly what you're comparing

GOOD	BETTER	BEST
		★ RECOMMENDED
Big Box Prefab	**Standard Dog Ear**	**Board-on-Board**
• Gaps between panels	• Slight gaps as it dries	• 100% privacy, no gaps
• Thin boards, stapled frames	• Boards nailed one at a time	• Overlap hides shrink gaps
• Panels can sag on slopes	• Built board-by-board	• Overlapping boards
• 4×4 posts throughout	• 4×6 gate posts	• 4×6 gate posts

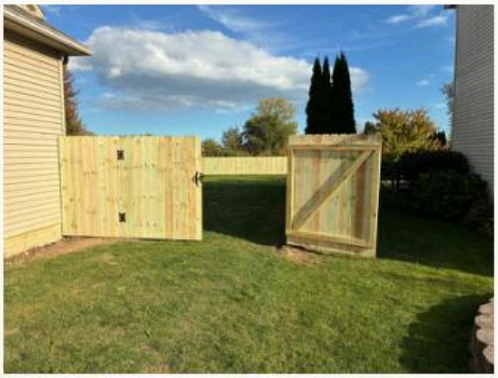

✓ **Complete Privacy** ✓ **Built On-Site** ✓ **4×6 Gate Posts** ✓ **3-Year Warranty**

Why Prefab Falls Short

Mass-produced thin pickets in stapled frames. They leave gaps over uneven terrain and start to sag within a few years.

Our Board-by-Board Difference

Built on site and custom-fit to your terrain, with 4×6 gate posts and galvanized nails throughout.

Standard vs Shadowbox vs Board-on-Board

Understanding the differences so you can choose the right style for your property

GOOD

Standard Privacy

Dog Ear

SPECIFICATIONS

Privacy: 90–95%

Look: Traditional

Both sides: No — one finished face

DOG-EAR PRIVACY

GFS-W-DOG

ELEVATION — 6' DOG-EAR PRIVACY · GOOD SIDE

PLAN VIEW

BUTTED, ONE FINISHED FACE

SPECIFICATIONS

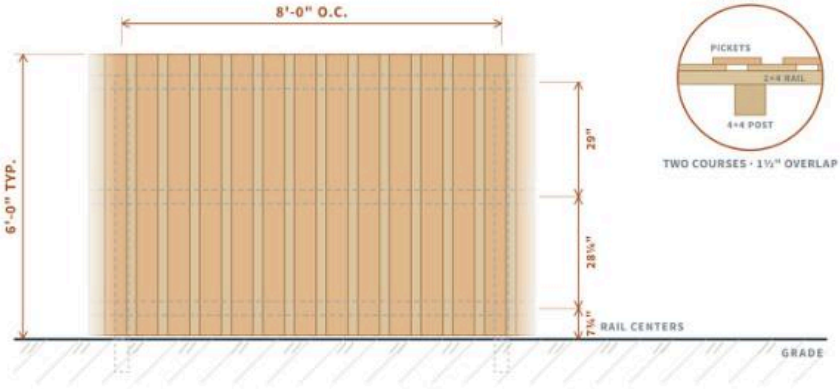

PICKETS	1×6 (5½"), dog-ear · cedar or PT
HEIGHTS	4', 6', 7' or 8'
RAILS	2×4 on edge · 3 rails at 6'
POSTS	4×4 · 8'-0" O.C. · 4×6 at gates
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand
FASTENERS	Galvanized: 3" framing, 1¼" pickets

The everyday privacy fence. Pickets butt tight on the street side, and the rails stay on your side.

BOARD-ON-BOARD

GFS-W-BOB

ELEVATION — 6' BOARD-ON-BOARD

PLAN VIEW

TWO COURSES · 1½" OVERLAP

SPECIFICATIONS

PICKETS	1×6, two courses · cedar or PT
OVERLAP	1½" on each edge
PRIVACY	100% — stays closed as boards shrink
HEIGHTS	4' or 6'
POSTS	4×4 · 8'-0" O.C. · 4×6 at gates
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand

Boards shrink as they dry. The overlap means you still can't see through it years from now.

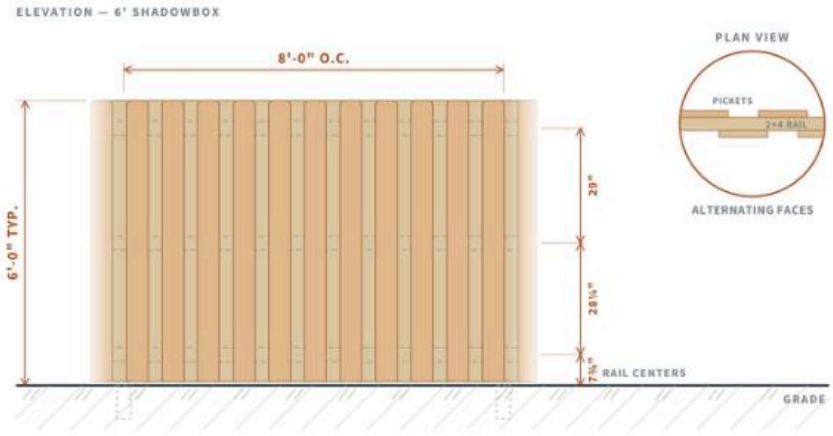

Built to spec, every time. Hand any other contractor the same drawing and the comparison gets honest fast.

Wood & Cedar — Build Specs

Shadowbox · Cap & Trim

SHADOWBOX (GOOD NEIGHBOR)

GFS-W-SHW

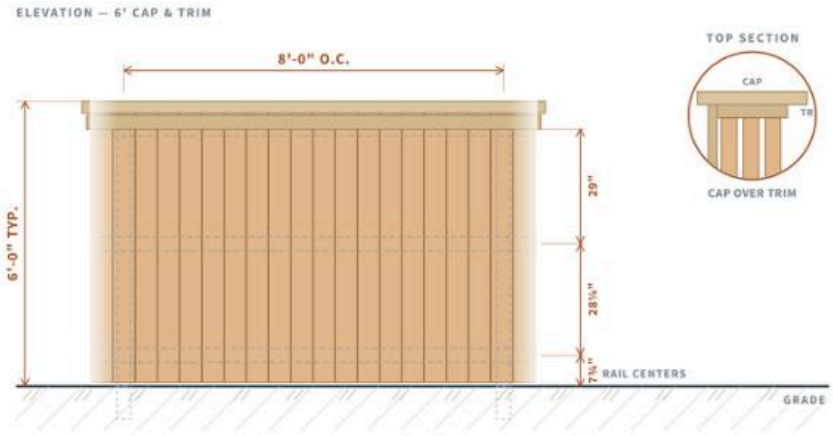

SPECIFICATIONS

PICKETS	1×6, dog-ear, both faces
SPACING	3½" gap per face · 1" overlap
BOTH SIDES	Finished — no "bad side"
HEIGHTS	4' or 6'
POSTS	4×4 · 8'-0" O.C. · 4×6 at gates
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand

Same look from both yards, and the wind passes through instead of pushing on a solid wall.

CAP & TRIM

GFS-W-CAP

SPECIFICATIONS

CAP	Flat cap board, full length
TRIM	Trim board on the face
BODY	Privacy, shadowbox or board-on-board
WOOD	Cedar or PT
POSTS	4×4 · 8'-0" O.C. · 4×6 at gates
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand

The cap covers the cut tops of the pickets, which is where water gets in and boards start to split.

No mystery lumber, no guesswork. Every board, rail, and fastener is called out before we quote it.

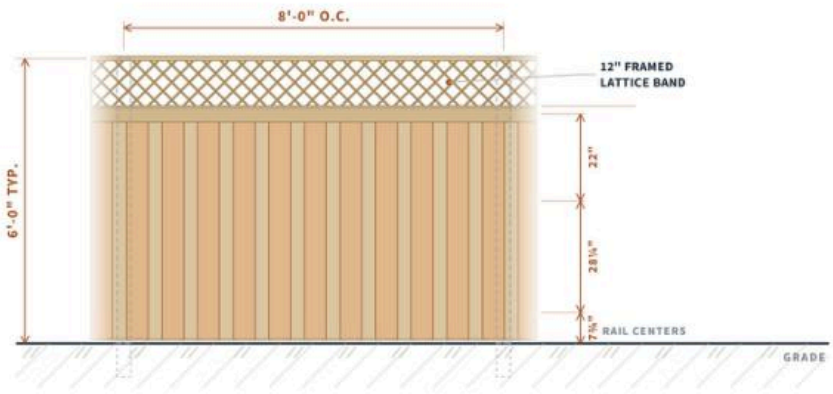

Wood & Cedar — Build Specs

Lattice Top · Semi-Privacy

LATTICE TOP

GFS-W-LAT

ELEVATION — 6' SHADOWBOX WITH LATTICE TOP

SPECIFICATIONS

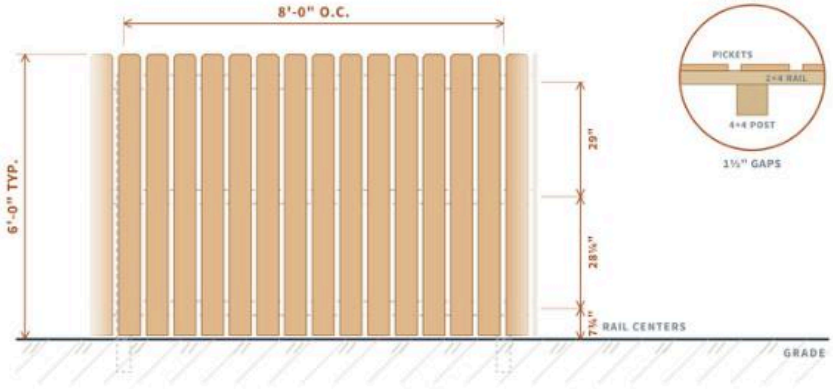

TOP BAND	12" framed diagonal lattice
BODY	Shadowbox below · cedar or PT
HEIGHT	6' overall
RAILS	2×4 on edge, lattice framed in
POSTS	4×4 · 8'-0" O.C. · 4×6 at gates
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand

Privacy where you stand, light and air up top. Popular around patios and pools.

SEMI-PRIVACY (SPACED PICKET)

GFS-W-SEMI

ELEVATION — 6' SEMI-PRIVACY · 6" PICKETS

PLAN VIEW

BOARDS	1×6, run horizontally
WOOD	Cedar or Cedar-tone PT
HEIGHT	6'
SPAN	Post to post, 8'-0" O.C.
POSTS	4×4 · 8'-0" O.C. · 4×6 at gates
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand

Clean modern lines. The boards run post to post with nothing showing on the face.

RANCH RAIL WITH WELDED WIRE

GFS-W-RNCH

ELEVATION — 4' 3-BOARD RANCH RAIL · 10' SECTION

PLAN VIEW

WIRE BEHIND THE BOARDS

SPECIFICATIONS

BOARDS	3 or 4 boards per section
HEIGHTS	4' (4½' with 4 boards)
WIRE	Black vinyl-coated welded wire
SECTIONS	10'-0" O.C.
POSTS	4×4 wood
FOUNDATION	Driven steel in clay · 4×6 in concrete in sand

The open farm-fence look, with black wire behind the boards so the dog stays in.

Your quote references these drawings. Also built: 4' spaced picket, 4' scallop-cut privacy, and 8' tongue-and-groove.

OPTIONAL UPGRADE

Steel Frame Gate Upgrade

Welded steel frames for wood gates that hold square and don't sag

Welded Steel Gate Frame

SPECS

- 1½" square steel tubing
- 100% welded joints
- Rust-preventive primer
- Sized to your opening
- Built not to sag

Standard Wood Gate

✗ Wood frame with a bracket
✗ Sags over time
✗ Needs periodic adjustment
✗ Harder to keep square when wide

Steel Frame Gate

✓ Welded steel perimeter
✓ Holds square, no sag
✓ Set it and forget it
✓ Built for wide and double gates

Recommended for: wide gates (5 ft+) · double drives · high-traffic openings · maximum durability

CEDAR CARE

Caring for Your Cedar Fence

Cedar asks very little — here's the whole maintenance story in three steps

Sealing

OPTIONAL, YEAR 1

Apply a UV sealant to hold the color, or let it weather naturally to a silver-gray. Both are fine — it's purely a look preference.

Stain / Re-seal

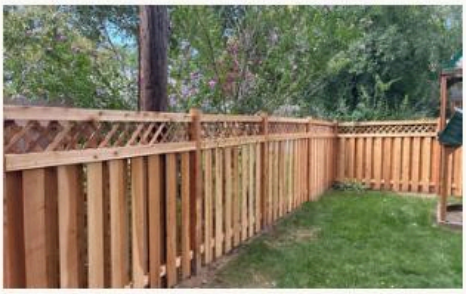

EVERY 3–5 YEARS

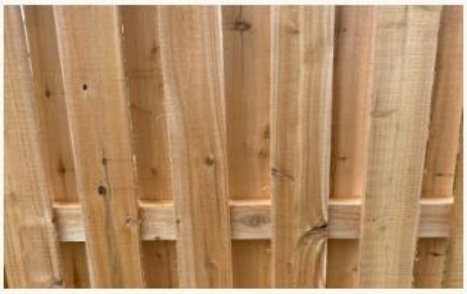

If you sealed it, reapply every three to five years depending on how much direct sun that run of fence takes.

Inspect & Clean

ANNUAL

Walk the line once a year: check for loose boards, clear leaves and debris, and trim back vegetation growing into the fence.

Ready for the cedar difference?

What Our Customers Say

Real reviews from Google, Facebook & BBB — reproduced word for word

★★★★★ **Roy Gene Palmer III**

Excellent Work and Great Customer Service

Nick did an outstanding job installing our traditional cedar picket fence. From the start, he was incredibly patient in working through the details of our project and offered several creative solutions when we encountered challenges with our property layout.

What impressed me most was how he worked within our budget constraints to find the best possible option without compromising on quality. The finished fence looks fantastic - the craftsmanship is top-notch and you can tell Nick takes pride in his work.

His communication throughout the project was excellent, and he was always willing to explain his recommendations and answer our questions. I'd definitely recommend Nick to anyone looking for a reliable fence contractor who delivers quality work at a fair price.

★★★★★ **Josh Smith**

Hired Nick and Ghareeb Fencing solutions. We opted for a cedar privacy fence. Nick knocked it out of the park. Price was very competitive and the job was completed on budget and on schedule. They left the yard in clean state and were happy to talk to the neighbors about what to expect with the install. 10/10 would recommend again

The fence has been up for about 6 months through winter and looks as good as when he installed it.

★★★★★ **Dashawn Nickson**

I just got my fence done today June 6, 2025 and let me say this is a five star Fencing service complete my entire yard within two days always on schedule always answer calls reasonable prices. The workers are very nice and they work extremely hard nonstop. I definitely recommend

---

★★★★★ **Jenny Wilhelm Pfeiffer**

Nicholas was amazing to work with! Nicholas was very knowledgeable and patient with us with our decision making. He did not push vinyl on us knowing that wasn't what we wanted, unlike the other companies that quoted us. Our fencing was built from scratch, no pre-made fencing here! We cannot say enough good things about this business and the gentleman that he had working with him on our project. All of his employees were very kind and respectful. 100% a customer for life and absolutely recommend if you are looking for new fencing! Oh and he beat his competitors by over $1000.00!!!! Thank you so much for our amazing fence!

★★★★★ **Theresa C.**

Had around 230 linear feet of white vinyl fence installed 6/25/25. They finished the job the next day. Nicholas and his team were wonderful. From beginning to end. From the communication to the product and the install. If you need a fence you don't have to look any further. I highly recommend.

★★★★★ **Jenna Spetz**

We have nothing to say but amazing things about Ghareeb Fencing! We were so undecided about what we needed/wanted for our awkward lot(s) and Nick was SUPER patient. He talked us through each option and listened to my endless rants. We gathered several quotes and went with Ghareeb for the trust value. Their team provided outstanding communication and made the process seamless. Highly recommend!

★★★★★ **Marissa Barnes**

Amazing to work with! gave a great quote & we're able to get our fence up quickly. even thought of our dogs making sure they would be able to come out if needed while he worked. cannot recommend them enough!

Frequently Asked Questions

Straight answers up front — and a real person at (419) 214-2107 for the rest

Q. How long does installation take?

Most residential fences go up in 1–3 days. We confirm your install dates before we schedule, and the crew cleans up daily.

Q. Do I need a permit?

Most local zoning requires one. We pull and handle permits for you — it's built into every quote.

Q. Do you offer financing?

Yes — financing is available for qualifying customers. Ask us for current terms and rates.

Q. What's the warranty?

Three years on workmanship from us, in writing.

Q. Do I need to be home during the install?

No — but we recommend being there for the first and final walkthroughs so you and the crew stay on the same page.

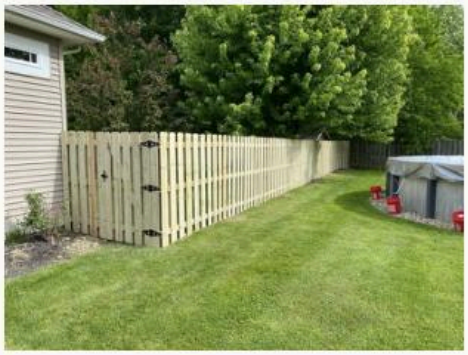

Q. What areas do you serve?

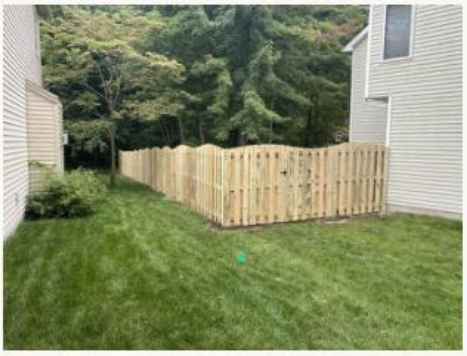

Northwest Ohio & Southeast Michigan — Toledo, Perrysburg, Maumee, Sylvania, Monroe, Temperance, and nearby.

COMPARE APPLES TO APPLES

What's Actually in Your Quote

The lowest number isn't always the lowest price. Here's what we spell out — and what's easy to leave off a cheaper bid.

IN EVERY GFS QUOTE	EASY TO LEAVE OFF A BID
✓ Post type, size, and depth *(in writing)*	✗ "Posts in concrete" with no depth listed
✓ Cedar species and grade, in writing	✗ Lumber just called "cedar" — which grade?
✓ Steel or aluminum gate frames and hardware	✗ Gate hardware added on later
✓ Post foundation matched to your soil	✗ One method for every yard, clay or sand
✓ Full grading and cleanup, debris hauled	✗ Grading and cleanup billed separately
✓ Permits pulled and handled	✗ "Permit is your responsibility"
✓ 3-year written workmanship warranty	✗ A verbal warranty only
✓ One accountable crew, owner on site	✗ Subcontractors, no single point of contact

Missing any of these? Then it isn't cheaper — it's just less finished. Ask for it in writing and the real comparison gets clear fast.

Payment & Financing

Pay the way that suits you — and spread it over time if that works better

SIMPLE 4-STEP PROCESS

Getting Started Is Easy

From the first call to the final walkthrough — here's exactly what happens

1

FREE CONSULTATION

Schedule your free on-site estimate. We walk the yard together, measure, and answer everything before you commit to anything.

2

CUSTOM PROPOSAL

Usually within a day or two, your detailed proposal lands in the client portal — exact materials, line-item pricing, and a timeline.

3

EASY APPROVAL

Review and sign digitally. Make your deposit by card, check, cash, ACH, or Venmo — and we pull the permits.

4

EXPERT INSTALLATION

Our crew installs with precision, cleans up daily, and walks you through the finished project before we call it done.
